- JEST testing
- SQL/NoSQL databases
- Apps architecture
- Self-managment
- Team work & good communications skills

LANGUAGES

- Español (NATIVE)
- English (B2)

PROFESSIONAL EXPERIENCE

Ssr Software Engineer

Alegra - March 2022 to March 2024

Worked in a rapidly growing environment, closely involved in product decision making. Mentored new developers, guiding them on creating better features and solutions, including code review. Integrated APIs and external services to deliver powerful features to end-users.

- Managed project utilizing diverse AWS services.
- Development with React, Node, GraphQL and MySQL.
- Mail service integration using AWS SQS and other services to reach to multiple users depending their own usage of application.
- CI/CD with AWS CodePipeline for a versionated deployment owned by a product used by thousands of users in various regions.

NODE JS - TUTOR

Coderhouse - January 2023 to June 2023

Was part of the team of tutors, providing pedagogical support to the students of the course and participating in their own path of knoledgment.

- Virtual accompaniment to students during and outside of classes.
- Correction of weekly challenges and pre-deliveries.

Salesforce Commerce Cloud Developer

Globant - March 2021 to February 2022

Globant was pivotal in my career. Here, I was part of a developer team holding 1-1 meetings with the client (a major fast food brand). Surrounded by great mentors I deepened my learning in backend, improved my soft skills, and work security aspects.

- Backend tasks made with NodeJS and Express
- Frontend tasks made with a owned-company framework similar to React
- Content management of static resources.
